

I agree with the survey results of not allowing cell phone usage on an airplane during flights. The phones that are on the backs of seats are already annoying enough when people choose to use them. People tend to talk louder into a cell phone than they do talking to people in person--and trying to talk on a cell phone in an airplane would make them talk even louder! I enjoy reading a napping on airplanes, and I do not think that I would like to hear someone yelling into a cell phone while I'm trying to do that. I appreciate you listening to what the people want. Thank You.
